Samuel Giuseppe Mauli

Co-founder & Tech Lead · Software Architect

+55 (47) 99277-0701 samuel.mauli@gmail.com github.com/samuelmauli Curitiba, PR — Brasil

I lead development teams and own product delivery end to end — from the business problem to what actually runs in production. Co-founder of Doublethree and tech lead, with 10 proprietary products live, mobile apps on both stores, and AI running inside the client perimeter.

Team leadership · Project management · End-to-end delivery · Architecture decisions · Client communication · Autonomy

EXPERIENCE

Co-founder & Tech Lead — One Way 2026 — Present

- I lead the development team: I prioritize the backlog, define the architecture and own delivery in production.
- Led the security remediation of the estate — VPN-only access, OIDC SSO and forward-auth allowlisting.
- Designed disaster recovery with defined RPO/RTO and a proven backup restore, not a presumed one.

Co-founder & Head of Technology — Doublethree 2024 — Present

- I lead the team and own project management end to end — from the client conversation to what runs in production.
- Designed, built and keep live 10 proprietary products, each solving a real business problem.
- Shipped and maintain 4 apps on both stores (React Native and Flutter), owning the full release cycle via ASC API and Play Developer API.
- AI inside the client perimeter: on-premise LLMs (vLLM), BYOK models and local ML in ONNX — no token leaves the client account.
- Own the infrastructure: AWS EC2 to VPS migration, ~20 processes across 8 businesses behind Caddy, observability and backup with proven PITR (38-min RTO).

Mid-level Developer — Grupo Negócios Públicos (Vanlink) 2025 — Present

- I lead development and architecture of the integrated SGI and CRM platform.
- Own two Flutter apps on the stores: real-time tracking, LGPD consent, validated geocoding and per-platform push (FCM / APNs).
- Cross-stack backend (PHP, Go, Python, Node.js): payment orchestration and AI automation — document extraction cut from 8 min to 10 s per document.

Java & PHP Developer — Meisters Solutions 2024 — 2025

- High-performance REST APIs in Java (Spring Boot, Hibernate/JPA) and PHP (Laravel) for an intercontinental team (Brazil, Mexico, Spain).
- Technical lead in Python/ML: optimized ETL/ELT pipelines in pharma, cutting processing time by 40%.
- Built BlauSight (quality management with generative AI) and Ballesol CareAI (E2E-encrypted AI agent on AWS).

IT Support Agent — Positivo Tecnologia 2023 — 2024

- Backlog triage and management supporting International Meal Company, with ITIL practice and criticality-based prioritization.
- Direct vendor interface and SLA management in a large-scale operation.

Oracle Technical Consultant — TRI CS Inc. 2023

- Enterprise integrations with Oracle Integration Cloud (OIC) and analytical reporting with BI Publisher, on multinational enterprise projects.

N1 Support Technician — ICI — Instituto Curitiba de Informática 2022 — 2023

- Technical support for the Curitiba City Hall (software, hardware and network), with ticket documentation and knowledge base.

SELECTED PROJECTS

Licitaqui
Autonomous agent that reads PNCP/Comprasnet tenders, runs multi-pass legal analysis with RAG and delivers the opportunities over WhatsApp.

Aportia
Capital and funding intelligence with explainable scoring and AI analysis in a BYOK model — the LLM key belongs to the client.

OnMe
Corporate mental health with local ML in ONNX Runtime, without any third-party AI call.

PaymentsHub
Bank payment orchestration in Go (PIX and CNAB 240) with human approval and an immutable event trail.

WhatsApp agents
Conversational layer on top of Meta Cloud API: result delivery, lead qualification and LLM support across the in-house products.

Lexis Predict
Predictive judicial provisioning (CPC 25 / IAS 37) with 100% on-premise AI: vLLM, XGBoost and SHAP explainability.

Wave Energia
Subscription-energy app and API (184k lines) shipped to both stores, with invoice reconciliation.

TECH STACK

AI / ML	LLMs · RAG · vLLM · BYOK · TensorFlow · PyTorch · ONNX · NLP · Computer Vision
Languages	Java · Python · Go · Rust · PHP · TypeScript · Dart · Kotlin · Swift · SQL
Mobile	React Native · Expo · Flutter · SwiftUI · Jetpack Compose
Backend	Spring Boot · NestJS · FastAPI · Laravel · Node.js · Next.js
Cloud / DevOps	AWS · Docker · Kubernetes · CI/CD · Caddy · Prometheus · Grafana
Data	PostgreSQL · PostGIS · MySQL · MongoDB · Redis · pgvector

EDUCATION

B.Sc. in Computer Science
Universidade Positivo

2022 — 2026

LANGUAGES

Portuguese	Native
English	Advanced (C1)
Spanish	Advanced (B2)
