Curitiba, Paraná - Brasil

FULL - STACK DEVELOPER

I am a trilingual Full-Stack Developer focused on end-to-end solution architecture. My experience spans Java (Spring Boot), PHP (Laravel), Python, and Node.js, where I focus on building systems and automating processes. On the front-end, I develop reactive interfaces with React, Vue, and Next.js, as well as cross-platform mobile applications using Flutter, Kotlin, and Swift. I work with cloud infrastructure and implement DevOps practices (CI/CD, Docker) to ensure high availability and scalability. I apply Artificial Intelligence to solve problems and add value, building scalable platforms such as SGI, CRMs, and LMS with integrations to banks and payment gateways.

CORE COMPETENCIES

- Problem Solving
- Time Management
- Strong Interpersonal Skills
- Multilingual Collaboration
- Critical Thinking
- Proactivity and Autonomy
- Adaptability
- Effective Communication
- Organization

PROFESSIONAL EXPERIENCE

Doublethree - Developer

2024 - The Moment

As a software consultant, I deliver complex end-to-end solutions, ranging from web/mobile applications to AI. I developed an Artificial Intelligence system for the chemical industry that uses NLP and Machine Learning to perform predictive root cause analysis in production processes. Additionally, I implemented Computer Vision solutions, such as a warehouse management system with facial recognition. My application portfolio includes mobile apps (invoice management and solar energy consumption), E-learning platforms (LMS), and access control systems (gatehouse) for industries, among other projects.

Grupo Negócios Públicos - Full Stack Developer

2025 - The Moment

I work as a Developer at Vanlink, leading the development and architecture of the integrated SGI and CRM platform. I am responsible for engineering payment control systems (PaymentsHub) and orchestrating APIs with payment gateways and messaging services. My work is cross-stack, using PHP, Python, and Node.js for different microservices and business process automation (BPA) solutions. I developed the SGI Platform — a complete management system with commercial, fiscal (integrated with OMIE), HR, and supplier management modules, featuring CRM, contract tracking, and insertion orders focused on marketing. In addition to development, I manage the cloud IT infrastructure, including system architecture, resource provisioning, and maintenance of CI/CD pipelines to ensure continuous delivery and high availability.

Meisters Solutions - Java and PHP Developer

2024 - 2025

Full-Stack Java (Spring Boot, Hibernate/JPA, Maven) and PHP (Laravel) developer for building high-performance RESTful APIs. Technical leadership in Python and Machine Learning projects, focused on optimizing data pipelines (ETL/ELT) for the pharmaceutical sector and an AI-powered NFe processing automation system in financial systems.

EDUCATION

Bachelor's Degree in Computer Science

Universidade Positivo 2022 - 2026

Languages

Advanced English (C1)
Advanced Spanish (B2)

Courses

- Data Engineering and Performance (Advanced SQL, Redis, RabbitMQ)
- DevOps and CI/CD (Git & dbt)
- Java Enterprise & Microservices
- Amazon Redshift Getting Started
- dbt Fundamentals
